

I am suppose to put "section 12" somewhere, couldn't find appropriate spot. Klove's radio station has been instrummental, not only for myself and family, but for many in my listening area. Their enouragement has help in my struggles through drug addictions to find my hope in God again and bring my family back together. This radio station has done the same for so many in my area, with so many different issues that come up on a daily basis. If this station is taken off the air, so many, myself included, would lose a station that provides more than music, we would lose help that we need on a daily basis; someone who is about to commit suicide, a child with problems with parents or friends, a single mother who is struggling to make ends meet and be both parents , someone who just needs a simple word of strength--these people and so many more, would never hear that word or song that keeps them from making dire choices in the heat of a stressed moment. I know this because this station has been this for me- has changed a life threatening decision I was about to make that would change the lives of my husband and three children forever on more than one occasion. Now, this station and the message it gives, helps me to get through daily things or just uplift me even when I feel a little down and even when life is great, helps me to love a little more or brings a little more joy to my happy moment. No other station, has do that. Please keep my Klove station from being taken off the air.
